Volume 11, September 27, 2011

Get an Education not Just a Degree! Believe it or not we are just over a month into the semester and it is time to look for an internship or permanent placement. This is when an "education" pays off. With **resumes for the career night due later this week** it is a good time to reflect if you are on track for an education and your career.

Construction and Facility Management Career/Roundtable Night is Oct. 12 at JQH Arena. You need to sign up by October 6th. Signup sheets will be brought to classes and can be found on the Kemper Bulletin Board. **Resumes need to be uploaded to the Career Center/Job Tracks by Sept. 28th** to be included in the resume book. All Construction and Facility Management Majors are expected to attend this event. Attire is minimum shirt and tie or equivalent. Even though employers will have a resume books you may want to bring copies of your resume. Many of the employers will interview on Oct. 13th. Some of the employers will require you to sign up for interviews in advance, check the career center website.

Interstates Construction Services will hold an information night September 29th in Kemper 102. Resumes need to be submitted to Job Tracks by the 25th. You may be able to sign up the night of the information session if slots are remaining.

University Career Fair Technology Management and other TCM Majors will want to check out the University Career Fair to be held on Sept. 28th in the PSU Ballroom from 10AM to 2PM. Companies like Kinze Manufacturing, Global Expedition Vehicles, and City Utilities will be attending.

Tailgating THIS SATURDAY, October 1st. **We will be starting with breakfast at 8AM.** Of course you can join us any time before the game at 1pm. Look for the department trailer on the North side of Bearfest Village. That's right, the North side, we are moving up! Remember tailgating is more than a good time... it is a networking opportunity.

Statics and Computational Calculus Tutoring! The department will provide tutoring for the previously mentioned classes in Kemper 205. Tutoring sessions will be every Monday from 5-8pm. This will be an opportunity for you to ask questions and work with other students. The purpose of tutoring is not to cover material you may have missed in class.

Construction Club The first Construction Club meeting is Oct. 5th at 5:45pm in Kemper Hall 102. For planning purposes, club meetings are scheduled for 9/7, 10/5, 11/2, 12/7.
