

“Our Finest Hour”
August 11th, 2020

Just a quick Tuesday morning update from the overcast okra patch:

Attached [here](#) is a file containing the COE guidelines for field and clinical placements this Fall. Thanks to the group that worked over the past several months to draft recommendations that would ensure our students meet DESE requirements should traditional approaches need to be modified. Thanks also to the COE folk who tweaked the language just a tad to make it clear we will provide either a traditional experience or an alternative virtual experience, whichever works best for students.

We will be discussing these guidelines, along with a handful of policies and procedures this Friday during our COE Meeting. See you there,

David
