

Come hear

**Kjell Lindgren M.D. and US Astronaut**

May 11<sup>th</sup>, 2012 at 3:00 pm in Temple Hall, Room 002

talk about

***Learning To Fly***

Kjell was inspired to become an astronaut by the brilliance and courage demonstrated by the pioneers of early human spaceflight, the thrill of exploration and the promise of discovery and the pure excitement of riding a rocket into space.

He just completed Astronaut Candidate Training where he learned to fly a T-38 fighter jet and underwent extensive instruction in the International Space Station systems. Come listen and enjoy as Kjell talks about those experiences and takes you into the "Wild Blue Yonder."
