

Come hear

Steve Nagel (Colonel, USAF, RET.)

May 15th, 2012 at 2:00 pm in Carrington Hall,
Room 208 talk about

*The US Space Program –
Past, Present, and Future*

from the perspective of one of the US Astronauts that
lived the adventure!

His career in NASA began in
1979 as the chase pilot for the
first shuttle mission and took
him through four flights, 723
hours in space and several space
walks.

His talk should be a fascinating look at what we
have learned during the space program and how
we can continue in the quest to understand what is
"out there."
